

# Set language

To change the language of the webmail, click on '**Settings**', then on "**Preferences**" and "**User interface**".

On top right corner, select language, then click on "**Save**" button at bottom.

The screenshot shows the Roundcube webmail settings interface. On the left is a dark sidebar with icons for Compose, Mail, Contacts, Calendar, Tasks, and Settings (which is highlighted). The main content area is divided into three columns. The first column, titled 'Settings', contains a list of settings categories: Preferences, Folders, Identities, Responses, Account, User Interface, Mailbox View, Displaying Messages, Composing Messages, Contacts, Special Folders, Server Settings, Encryption, and Calendar. The 'User Interface' category is selected and highlighted in light blue. The second column, titled 'Main Options', contains several settings: Language (set to English (GB)), Time zone (set to Auto), Time format (set to 07:30), Date format (set to 2023-07-24), Pretty dates (toggle on), Display next list entry after delete/move (toggle on), and Update (check for new messages, etc.) (set to every 1 minute(s)). The third column, titled 'Interface skin', shows a list of skins: Classic (by The Roundcube Dev Team), Elastic (by Aleksander Machniak, selected), Elastic2022 (by Sebastian Mille), Larry (by FLINT / Büro für Gestaltung, Switzerland), and Litcube-f (by Roundcube Plus). Each skin has a small preview icon and a link to its license. At the bottom of the 'Interface skin' section is a blue 'Save' button.
