

Set language

To change the language of the webmail, click on '**Settings**', then on "**Preferences**" and "**User interface**".

On top right corner, select language, then click on "**Save**" button at bottom.

The screenshot displays the Roundcube webmail settings interface. On the left is a dark sidebar with icons for Compose, Mail, Contacts, Calendar, Tasks, and Settings (which is highlighted). The main content area is divided into three columns. The first column, titled 'Settings', contains a list of categories: Preferences, Folders, Identities, Responses, Account, User Interface (highlighted), Mailbox View, Displaying Messages, Composing Messages, Contacts, Special Folders, Server Settings, Encryption, and Calendar. The second column, titled 'User Interface', shows various options: Language (set to English (GB)), Time zone (Auto), Time format (07:30), Date format (2023-07-24), Pretty dates (toggle on), Display next list entry after delete/move (toggle on), and Update (check for new messages, etc.) (set to every 1 minute(s)). The third column, titled 'Interface skin', lists several skins: Classic (selected), Elastic, Elastic2022, Larry, and Litcube-f, each with a small preview icon and a link to its license. At the bottom of the 'User Interface' section is a blue 'Save' button.
